

Connex Ecommerce Client Success Stories

At Connex Ecommerce, our core mission is to help small e-commerce businesses grow. Our passion lies in providing seamless solutions that empower entrepreneurs to scale their businesses. Through our innovative syncing automation for Shopify and Amazon sellers, we streamline operations, optimize workflows, and unlock new levels of efficiency. But don't just take our word for it. Here is what our customers said.

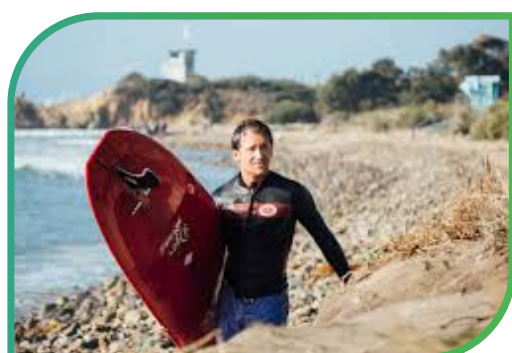

Check out what Mitch Hollander, Vice President of Bridal Outlet, says about his experience using Connex: “I did research after research. Once I came across ShipStation and found that Connex could connect all parts of my workflow, the puzzle finally came together. It’s a domino effect. Once my job became easier, the pressure had been taken off other people as well. Connex just works and I don’t have to think about it. With Connex, the door opened up for the full e-commerce experience.”

Curious about Fair Harbor's perspective on Connex? Allie Wightman, COO, shares: “It is easy to map our order types. Connex is also user-friendly with the set-up, and support is always helpful. The Connex Team has also been great when needed.”

Discover why Emily Imbach, Founder of Embach Solutions, values Connex “Our main reason for using Connex was to save time from doing manual data entry. It worked really well for my client, Chinook Farms, so I recommended it to Bare Bones Broth. Once we had Connex running, operations at Bare Bones went much more smoothly. Connex takes only a few hours to set up and run. My favorite part is that it takes care of all the manual work and captures all the important details for accounting.”

Find out why Troy Mothershead, Director of Planning and Business Development at True Ames Surf Fins, is 'stoked' on Connex: “We are stoked on Connex and what it provides. It is mission-critical to have invoices and inventory integrated between Shopify and Quickbooks, and Connex gets it done! This was a solid upgrade from our previous Shopify to Quickbooks Desktop tool. Mostly because of the scheduler and ability to run the connection automatically.”

This is what Don Tashman, Founder and CEO of Loaded Boards says about using Connex: “Loaded Boards has been using Connex since 2015. It has greatly streamlined our processes and runs seamlessly. We’re big fans and recommend Connex highly to anyone using Quickbooks Enterprise and one or numerous channels.”

Take a look at what James Satloff, founder of award-winning Liberty Ski's said: “Your product allowing us to keep our Shopify store and QBO accounts, sales & inventory all properly synced continues to be a real help and appreciated value. As well, I would also like to say- as we are a small and not terribly tech-savvy team- your customer service and troubleshooting on the rare occasions we have needed it- has been exemplary.”

Joe Petruziello, a seller on Amazon, Shopify, WooCommerce, and Founder of Point One International, relies on Connex: “When making business decisions, I had to keep in mind that my cost of goods sold (COGS) was different on different sales channels. Keeping the books up to date would have been impossible to do without Connex.”

Kate Harvey, Co-Founder of Bare Bones Broth, values Connex's flexibility: “I love that Connex is flexible, customizable, and reliable. It just works, so I don’t ever have to think about syncing my inventory and sales orders from Shopify to QuickBooks. It seems like my accounting team has infinite options for tailoring the connector to our specific needs.”

Take the next step towards unlocking your business's full potential by using our automated QuickBooks integration and ecommerce analytics tools. Explore how Connex can elevate your online presence, streamline operations, and drive growth. Don't miss out on the opportunity to revolutionize your business.
