Connex Ecommerce Suite

Connex for QuickBooks

If you're an ecommerce business utilizing QuickBooks, you've likely encountered frustrations with manual data entry or encountered unreliable and complex QuickBooks integrations. You might have even contemplated investing in custom software tailored to your specific business requirements. But what if advanced, customizable automation didn't have to break the bank? *Enter Connex for QuickBooks.*

Connex for QuickBooks seamlessly combines advanced functionalities within an intuitive user interface for QuickBooks Online or Desktop editions. We cater to sellers on Shopify, Amazon, Square, BigCommerce, and WooCommerce, as well as users of ShipStation. Our secret weapon? The Rules Engine, empowering you to tailor our integration to your unique needs, all through an affordable solution.

Here's a glimpse of what we offer:

- ⊘ Two-way inventory sync between QuickBooks and your various marketplaces
- ⊘ A summary sales tool designed for handling large order volumes efficiently
- ⊘ Automated syncing of orders to QuickBooks Online or Desktop
- ⊘ Seamless synchronization of partial and full refunds
- ⊘ Automated mapping of sales tax to streamline your tax processes
- ⊘ Automatic matching of deposits for Shopify, Amazon, Stripe, and Square payments
- ⊘ Flexible field mapping customization facilitated by our proprietary Rules Engine

Concerned about setup time? *Fear not.*
The majority of our customers are up and running with Connex for QuickBooks within a week of purchase, with our dedicated team handling the setup for you.

Say goodbye to the headache of manual data entry and unreliable integrations. Connex for QuickBooks is here to streamline your ecommerce operations affordably and efficiently.
